

## THE RUBY ROOM

### Concert & Corporate install MACs into Burswood Resorts latest nightclub

Burswood International Resort Casino's contemporary new multi-million dollar nightclub, The Ruby Room, is the talk of the town bringing an exciting new night vibe to Perth.

Featuring four bars, numerous cosy lounge areas, and a large stage and dance floor, The Ruby Room has a dynamic lighting system designed and installed by Concert & Corporate Productions.

"The club has an interesting design particularly the glass wall which enables people to look down onto the gaming floor on another level," said Tim Bradsmith, managing director at C&CP.

Sixteen Martin MAC moving head fixtures provide the majority of the club lighting. Over the stage area there are four MAC500 and four MAC600, the same hung from a four metre ring of truss over the dance floor.

Custom glass gobos, manufactured by Lighting By Design, featuring the Ruby Room logo as well as a ruby-type gobo provide a prominent design element.

"I chose the Martin MACs because they are reliable and because of the effects you can achieve with

them," said Tim. "We also have another fifty units in stock so there's always back up if needed."

C&CP also refurbished twelve Martin Pro400 fixtures, which had been used previously in the Resort's Cabaret Lounge, for the club.

"We gave them a good clean up and they've been really effective," said Tim. "These are the original series one Pro400s but they are running beautifully. The MACs provide impact lighting above the dance floor with the Pro400s placed on the outside pointing in to the dance floor. It's a very nice look.

"The MACs just keep on running, we've only given them a bit of a clean. The resident lighting person at the club is very impressed with the whole system."

Control is a Jands Hog 1000, haze is by a DF50 and the trussing was supplied by Concert Lighting Systems.

One interesting point is that the club is a non-smoking venue and when C&CP serviced the equipment they noticed a big difference in the gear.

"There was much less residue and filth on the lights, it makes you wonder!" said Tim.

## EQUIPMENT LIST

8 x Martin MAC500  
8 x Martin MAC600  
12 x Martin Pro400
